The new crop seed corn of the well known extra early Bismarck type will be light in yield, good in quality and somewhat higher in price. We are now booking new crop seed corn orders for spring delivery. Let us hear from you if interested in either old crop seed corn for prompt or new crop for deferred delivery.

BOB WHITE FEEDS ARE HIGH IN QUALITY AND REASONABLE IN PRICE

BALANCED RATIONS FOR PLANT LIFE ARE AS NECESSARY AS BALANCED RATIONS FOR ANIMAL LIFE

POULTRY

DAIRY

SOIL

BOB WHITE Feeds are high in quality, scientifically blended, and contain just the right proportions of different food elements that the poultry and dairy experts have proven necessary.

BOB WHITE Farm Mix 32% protein is for mixing with home grown grain. It supplies the missing proteins, minerals, and other milk essentials in the most digestible form.

Pure Cane Molasses is used in the manufacture of all of our dairy feeds for the reason that it improves palatability, increases water consumption, and aids digestion.

Guaranteed Analysis: Protein 10%, Fat 3%, Fiber 9.5%. Feed twice a day with straight oats for the third meal. Your horses will greatly benefit by giving them BOB WHITE GREEN MEADOW FEED.

GROMOR MINERAL FERTILIZER is a product of the BOB WHITE MILLS. It comes packed in heavy burlap bags. It is a scientific mixture of Sulphate of Ammonia, Treble Superphosphate and Muriate of Potash.

Dec. 10, 1929.

FOR SALE BY
SIMMONS SEED COMPANY,
MOORHEAD, MINN.

DO YOU KNOW that Bismarck Type Seed Corn

(N W Dent-Minn #13 Haney strain-Gehu Flint-White Cap
Rustler-White Flint-Falconer-Golden Dent-Minn #23 etc.)

1. will mature 10 days earlier than late types of same corn that have been bred up in Minnesota and So. Dak.
2. will yield equal or better than the later types of same corn.
3. will make a growth of fodder almost equal to later types because of the larger amount of leaf in the early types. We have a good supply of this Bismarck type Seed Corn grown near Bismarck and grown elsewhere from Bismarck seed. Use this Bismarck type seed corn and you will raise mature corn. For silo or fodder corn we also have Minnesota and South Dakota grown Northwestern Dent, Minnesota #13 and Rustler White Dent of late types.

NOTE: We now have for prompt shipment only some fancy N W Dent and Minn #23 Old Crop 1928 SEED CORN which we offer while it lasts.
